

Mustang[®] Corrosion Coupon Holder

The Mustang[®] Corrosion Coupon Holder secures a corrosion test coupon in the flowing gas by using an orifice fitting. The Mustang Corrosion Coupon Holder allows monitoring of internal corrosion rates throughout a pipeline system without the need of additional access ports.

APPLICATION

Metal loss coupons are widely used to measure the rate of internal corrosion in natural gas pipelines. The Mustang Corrosion Coupon Holder can be used extensively in transmission pipeline systems where orifice fittings already exist for other purposes.

The Mustang Corrosion Coupon Holder is used with a standard orifice plate seal unit (available separately).

Natural Gas

FEATURES

- Patented design
- Fits into a standard orifice fitting
- Available in range of sizes
- High-density polyethylene dielectric barrier

BENEFITS

- Avoid costly installation through dedicated port
- Short insertion and removal times
- No construction required
- Meets integrity requirements of pipeline operators

PRODUCT DIMENSIONS

Front View

PRODUCT SPECIFICATIONS

Coupon Holder Plate	316 SS
Dielectric Insulation	High-density polyethylene (HDPE) Nylon screw
Ring Thickness	1/8" thickness for orifice fittings 4"-8" 1/4" thickness for orifice fittings 10" and larger Other thicknesses available
Plate Nominal Diameter	4" Diameter 6" Diameter Contact for other sizes

Use the bold alpha-numeric characters from the table above to build your model number:

MCCH - _____
 Plate Diameter /

STANDARD SEAL UNIT

A standard seal unit, compatible with the intended orifice fitting, is required and available separately.

Analytically Accurate[®] TECHNOLOGY

About Mustang Sampling

Mustang Sampling, LLC is the innovator of Analytically Accurate[®] solutions within sample conditioning systems. We provide custom solutions of products and services globally to the Natural Gas, Natural Gas Liquids (NGL), and Liquefied Natural Gas (LNG) industries. Mustang Sampling continues to pioneer integrated control systems, allowing our customers to maintain phase stability from sample extraction at the source through sample analysis. Our products are continuously improved and subjected to the highest quality standards which provides our customers with the best sample conditioning solutions.
